

Quality Access Doors - **FAST!**

SUBMITTAL/TECHNICAL DATA SHEET

DESCRIPTIONS

The window combines the advantages of a roof window and a roof access window. It is side-hung and therefore side-opening (left opening). Once unlocked, the sash can be opened to 90°. The large size of the roof access window ensures safe and easy access to the roof. A gas spring fitted in the top part of the window makes opening easier, holds the sash stable when opened and prevents against accidental closure.

FEATURES

- Manufactured in pine and vacuum impregnated.
- Designed for rooms with periodical-ly elevated humidity levels.
- Handle positioned in the middle of the sash allows opening or micro-opening.
- Equipped with the G3 single chamber sun screening glazing unit, internal glass toughened and warm spacer.
- Wide range of internal accessories the same as those for roof windows.
- Suitable for pitches from 15° - 55°.
- Installed with special flashings.
- Quick and easy installation without using brackets.
